No. 269.—

Rules for the levy of fees for work done by the Department of Industries in connection with the installation of oil-engines and pumps.

1. Land-owners and agents desirous of seeking the advice of the Director of Industries in regard to the installation of oil-engines and pumps must pay a fee of Rs. 10 with their applications for the same.

2. For the supervision and erection of oil-engines and pumps by the Department of Industries, a fee of 25 paise per 1000 lbs. of the machinery in Madras, subject to a maximum of Rs. 50, will be levied. This fee includes the cost of all supervision and the running of the plant in a satisfactory manner for one month after its erection.

3. Land-owners and agents desirous of having their plant inspected and adjusted from time to time may do so by applying to the offices of the department. The fee charged when an Upper Subordinate is employed in doing the work will be Rs. 10 and the fee charged when the work is entrusted to a mechanical foreman will be Rs. 5. The owners of the pumping plant will in addition have to pay the actual cost of all repair work undertaken.

4. Land-owners and agents will be permitted to compound the before payable under rule 2 by the payment of an annual fee of Rs. 15 which would entitle them to have their installations inspected and adjusted once a quarter or whenever a breakdown occurs. This fee should be paid in advance at the beginning of each official year. It will, however, be within the discretion of the Director of Industries to refuse the compound fee in any year in the case of any applicants who are found to have made frequent requisitions in the previous year either without reasonable cause or to set right breakdowns caused by the engines or ignorance of their design.

5. The Director of Industries is authorized to act as Consulting Engineer to persons who wish to obtain his advice in regard to the preparation of plans and estimates for undertakings in this Field; but, the maximum fee for this being Rs. 50.

6. In cases where the levy of fees is likely to operate as a burden on the slender resources of applicants, the Director of Industries may remit the whole or part of the fee at his discretion.

No. 270.—

Rules for the levy of fees for boring work done by the Department of Industries.

1. When a boring party is established in a tank, the fees will be notified in the District Gazette. Applications for boring should be made to the office in charge of the boring party and should be accompanied by a fee of Rs. 2 which will not be refunded in any case.

2. The applicant will be expected to cart the tools at his own expense and within a reasonable time to the place where he wishes the boring to be made. In no case will he be expected to cart tools more than 10 miles and generally arrangements may be made so that the distance the tools have to be carted is considerably less than this.

3. The boring tools will be in charge of a qualified maulster and for his services a fee of Rs. 1 a day will be charged. The applicant for whose benefit the boring is made will supply all the necessary labour. If a boring press is failed, the fee may be waived or a second and, if necessary, a third boring may be undertaken here of charge within the limits of the applicant's land, provided there is anything to justify the assumption that a different result will be obtained.

4. The results of a boring will be communicated to the applicant and he will be advised what steps to take to obtain the full benefit from the water-supply available. In cases where sub-surface water is met with, arrangements will be made to put down a suitable permanent tube, the whole cost of which will be met by the applicant.

5. The Department of Industries will undertake within the means at its disposal to supply pumping power for the purpose of testing existing wells to ascertain the water-supply available. The cost of water will be required to pay the actual cost of transporting the engine and pump to the site and the charges for fuel and labour incurred in working the same.

PROPOSALS OF THE BANANA EXHIBITION OF 1908.

Introduction.—With the sanction of His Excellency the Governor of Mysore, the Committee have the following proposals in connection with the Exhibition of 1908.

1. *Opening of the Exhibition.*—This year the Exhibition will commence on Monday, 18th October 1908, and close on Sunday, 24th. The Cattle Show will begin on Monday, 19th October, and close on Thursday, 26th. It may be observed that the show generally offers a good opportunity for people desirous of purchasing good specimens of Mysore cattle.

2. *Object of the Exhibition.*—The primary aim of the Committee is to help to the Exhibition as educative character and to bring together artists, machinery and processes, the use of which it is desirable to bring to the notice of the public, the artists and the manufacturers by actual demonstration. But as the Exhibition of a single specimen may not afford full information, and may not be sufficiently attractive to the visiting public, articles intended for sale will also be admitted.

3. *Articles on sale.*—Articles on a large scale and mostly for sale will have to be kept in separate stalls and under the charge of the exhibitors or their agents. There is no objection to the sale of actual exhibits, but they will not be allowed to be removed from the Exhibition grounds till the close of the show. Articles admitted for purposes of sale alone may be removed after purchase. No article will be allowed to leave the Exhibition grounds without a given pass.

4. *Plan of the buildings.*—A plan of the Exhibition grounds showing buildings and the extent of covered and open space available is appended to these proposals (not repeated here). Those who desire to have special facilities for the sale of articles or demonstration of processes, are requested to place themselves in communication with the Secretary to the Exhibition Committee.

5. *International show.*—The Horticultural Show comprising "class" and "group," etc., mentioned in the first section of the proposals, will be held on the 10th October 1908, and kept open till the close of the following day.

6. *Lectures and Demonstrations.*—Lectures will be delivered by competent persons in English and Kannada on subjects connected with Industry, Agriculture, Health and Sanitation, the value of agricultural implements and machines, their cost, construction and repairs. Arrangements will also be made for holding a competition on the Exhibition grounds in Ploughing, Weeding and processes connected therewith. The exact time and the place of the lectures and demonstrations will be announced here as by handbills and notices.

7. *Exhibitors.*—The Committee would thankfully accept donations for awarding prizes or medals from individuals or associations desiring to give an impetus to any special branch of Agriculture or Industry.

8. *Classification of exhibits.*—The classification of exhibits will be according to the plan laid out in the prospectus and notices in several sections should be made in the application forms prescribed.

9. *Exhibit in all India.*—The Committee invite exhibits from all the districts in the State as well as from outside. They also appeal to the various agricultural departments and associations in other parts of India, Burma and Ceylon to help them with exhibits and suggestions.

10. *Judges.*—Leading experts and non-official gentlemen will be invited to join the Committee in judging the exhibit.

11. *Admission fees for visitors.*—An admission fee of seven paise per head will be levied each time a person enters the Exhibition buildings. Women tickets will be issued at the 1 paise head. There are no refreshments, but tickets of eight paise tickets may be had also at Rs. 1 per bush. If possible return railway season tickets between Bangalore and Mysore at a reduced rate which will assist to the exhibitors for the whole season, will be arranged for.

RULES AND REGULATIONS.

1. *Prohibited articles.*—Explosives or any substances noxious or dangerous will not be admitted by the Committee.

2. *Prohibition of alcohol.*—Intemperance exhibits are requested to send to the Secretary to the Exhibition Committee, specimens of exhibits they intend to forward and the amount of space which their exhibits may take up in the necessary entry form appended to this prospectus. applications, to have them filled up by intending exhibitors, complete them, and to forward them to the Secretary.

6. *Articles not accepted.*—The classified list of prizes will show the nature of articles which are accepted at the Exhibition. Articles not specially mentioned in the prize list may, however, be admitted by the Committee at their discretion.

7. *No fees to be charged for exhibits.*—No fee will be charged for the admission or registration of exhibits or for the space allowed for them.

12. *Exhibits which have already won prizes.*—Exhibits which have won premier medals in the Mysore Exhibitions of 1896, 1897 and 1898 shall be privileged from competing for prizes, though there is no objection to their being accepted for purposes of show or sale.

13. *Date of delivery of exhibits.*—Intending exhibitors are requested to send the exhibits so as to reach Mysore on the 15th September 1905, from which date the Committee will arrange to take charge of exhibits. But no exhibits will be received after the 15th October 1905.

14. *Delayed exhibits.*—Articles that are not delivered at the Exhibition Hall in the time fixed may be admitted at the discretion of the Committee subsequent to the date mentioned in paragraph 13, but shall not be entitled to compete for prizes.

20. *Special arrangements to be made of the exhibitors' expenses.*—If the exhibitors require any special arrangements to be made (as to leave to attend their machinery) they must carry them out at their own expense, but the Committee will be glad to give such advice as may be possible in the shape of giving skilled or unskilled manual labour at the exhibitors' expense. The expenses of demonstrating machinery and implements should be borne by the exhibitor except when special arrangements have been made with the Committee.

21. *Perishable exhibits.*—All exhibits which must be forwarded under the charge of an attendant.

22. *Exhibits accompanied by men or dogs.*—Exhibitors who are unable to attend personally or send their agents in charge of exhibits may make special arrangements with the Committee for the exhibition of their goods on payment of advance or, in, at the estimated expense.

23. *Shipping of exhibits.*—The Committee entrust the work of receiving the exhibits to responsible officials. But as the goods are loaded onto the Exhibition grounds by special arrangements, it is not possible to weigh every consignment before taking delivery of it. So exhibitors are requested to make every possible provision in packing their exhibits and to send to the Committee in time an accurate list of exhibits sent by them. Exhibitors who wish that their consignments should be weighed at the

Refinery station before delivery, should indicate their wish to the Secretary in time and remit in advance a special fee of Rs. 1 on each consignment to be thus weighed.

REPAIRS TO KUMULI-KURUVANATH ROAD, MADURA DIVISION.

P.O.D. No. 478 I., dated 2nd April 1958, and Madura District Board Proceedings, No. 10, dated 19th May 1958, the extensive repairs to the Kungal-Kuruvanath road from mile 44½ (from Veerayachalam) to mile 59½ ordered in the above-mentioned correspondence will consist:—

- (1) The building of many culverts and probable stoppage of all traffic.
- (2) The blocking of rock at various places along the road and stones and other material lying on the road.
- (3) Excavation for rebuilding culverts on a large scale.
- (4) Filling sand.

Owing to this the road will probably be dangerous to all traffic between sunrise and sunset until further notice. Arrangements will be made as far as is possible to maintain the danger owing to these and other repairs.

Timber and other materials (if allowed to in any way obstruct this road) which are not cleared within 12 hours of being left on the road, will be cleared by the Public Works Department authorities as a matter of course, and those who obstruct will be responsible for loss or damage to themselves. Every endeavour will be made by this department to try and let traffic through during construction of culverts and other work. Blasting will generally take place between 8 and 9 a.m. and 1 and 2 p.m., but the public are advised to make careful enquiries before proceeding along the road.

In some cases, such as reconstructing existing culverts, it may be necessary to close the road for three days; when this is necessary, notice will generally be given three days beforehand at Kumbakonam and Kumbakonam.

There were eight or nine hours during the month. The resultant corresponding to the above numbers is represented by S.W. by S. wind, blowing with a uniform daily velocity of 41 miles.

The monsoon across the Peninsula was strong at the beginning of the month; heavy rain was falling on the West Coast but very little in the Carnatic or on the East Coast. During the first week however the monsoon fell off in strength and remained light for the rest of the month. With this change northwesterly winds set in over the Deccan and Madras districts and showers became more frequent and general over the East of the Presidency. These conditions prevailed for the rest of the month, with falling barometer, the air warmer, temperatures lower and skies more cloudy than usual over the greater part of the Presidency. On the West Coast rainfall was lighter than usual.

Thunderstorms occurred at Madras on 6 days, distant thunderstorms on 5 other days and lightning was recorded on 12 other days.

STATEMENT OF OBJECTS AND REASONS.

The object of the Bill is to prevent the spread of dourine, a contagious disease of horses which is spread by saliva. The disease is fatal to this disease dourine was first brought to the notice of Government in 1902. As it was reported to constitute a serious menace to the horse-breeding industry in the country, precautionary measures were at once taken experimentally to check the spread of the disease, especially in the horse-breeding districts of Northern India. In the following year attention was again drawn to the importance of the subject, and as the result of a report by the present Inspector-General of the Civil Veterinary Department, further executive action was taken. After consulting Local Governments it was eventually decided that, in order effectually to check the disease, legislation was necessary.

2. The Bill, which is self-explanatory, has been drawn up on the model of the *Glasgow and Ferry Act, 1906*. It is permissive in character and has been drafted so as to allow the widest discretion to Local Governments as regards the registration of stallions maintained for breeding purposes.

3. Dourine cannot be diagnosed except by bacteriological examination, and sub-clause 5 (b) accordingly makes proof of the disease by bacteriological examination a necessary preliminary to further action under that clause. It is considered advisable to confer the sole operation of post-mortem as much as possible in dealing with the almost undetectable disease, and liberal provision has been made in clause 6 for the payment of compensation when necessary.

THE SCHEDULE. ENACTMENTS REPEALED. (See Section 30.)

Year.	Chapter.	Short title.	Extent of repeal.
1900	III	The Indian Paper Currency Act, 1900	So much as has not been repealed.
1900	II	The Indian Paper Currency (Amendment) Act, 1900	The whole.

STATEMENT OF OBJECTS AND REASONS.

The object of this Bill is the amendment of the Indian Paper Currency Act, 1861, in two directions as described below:—

Firstly,

- (1) by declaring currency notes of the denominational value of rupees ten and fifty to be "universal," (as currency notes of the value of five rupees already are), that is to say, to be legal tender in any part of British India and payable at any currency office; and
- (2) by taking general power to make a similar declaration regarding currency notes of other denominations, at any time from time to time to be found expedient.

Secondly,

- (3) by abolishing the existing sub-sterling denominations, under which currency notes other than universal notes are at present payable not only at the office of issue, but also at the Presidency-towns in which the office is situated; and
- (4) by substituting independent sterling notes of value at Calcutta, Lahore and Karachi and establishing the Calcutta sub-sterling office.

As the amendment of this Act involves considerable amendment of the existing Act, it has been thought advisable to take the opportunity of consolidating the law on the subject. The present Bill is, therefore, introduced as a consolidating Bill regarding and replacing Act III of 1861.

The amended notes on the various clauses of the Bill explain the amendments proposed, other than petty verbal changes such as the reference to the present Indian Currency Act instead of to that of 1861 in clauses 12 and 13.

The 20th August 1899.

GUY FLEETWOOD WILSON.

Notes on Clauses.

Clause 2 contains a definition of the term "universal currency note."

Sub-clause (5) provides for the immediate suppression of the ten and fifty rupee notes, and sub-clause (6) is designed to obviate further amendment of the law of experiment should show that other notes can beneficially be introduced.

Clause 3.—The latter part of section 3 of the existing Act is rendered unnecessary by the changes proposed in clauses 2 and 4, and has accordingly been omitted.

Clause 5.—Section 4, clause (6), of the existing Act has been altered to provide for the use of notes of rupees; and the retention of clause (5) is rendered unnecessary by the abolition of sub-sterling.

Clause 6.—In view of the abolition of sub-sterling, it is considered unnecessary to retain the distinction between Deputy Commissioners and Commissioners of Paper Currency. Hereforward all will be Commissioners.

Clauses 7, 8 and 10.—The changes made in sections 8, 9 and 10 of the Act are rendered necessary by the proposed abolition of the post of Deputy Commissioners of Paper Currency.

Clauses 11 and 12.—The sections concerned with "legal tender" and the circulation of notes have been modified to provide for the universal notes.

Provisions (1) and (2).—In clause 11 contains the privilege of double endorsement (at the local office and at the head office of the note) to sub-sterling notes of what will hereafter be separate notes issued prior to the passing of the Bill.

Clause 13.—This is a new clause, designed to provide, particularly, for the future treatment of notes issued from Calcutta and now current, and, generally, for any future case in which it may be found necessary to close an office of issue.

Clause 14.—Power has been taken to make rules, such as are already in force under existing instructions, for dealing with the circulation of lost or mutilated notes.

"My Lord, the resolutions submitted speak eloquently of the gratitude of the whole Sikh community from the Ruling Chieftain down to the lowest rank of soldier to Your Excellency's sympathies and kind Government, and I need not say that the Sikhs look forward to the day when the Bill will become law."

"With these brief remarks I beg leave of Your Excellency to move that the Bill be referred to a Select Committee consisting of the Hon'ble Mr. Sushil, the Hon'ble Sir Herbert Stanley, the Hon'ble Mr. Mark and myself."

The motion was put and agreed to.

INDIAN VOLUNTEERS (AMENDMENT) BILL.

His Excellency the Commander-in-Chief moved that the Bill further to amend the Indian Volunteers Act, 1905, be taken into consideration.

The motion was put and agreed to.

His Excellency the Commander-in-Chief moved that the Bill be passed.

The motion was put and agreed to.

DOOMINEE BILL.

The Hon'ble Mr. Munro said:—"My Lord, I move for leave to introduce a Bill to provide for the prevention of the spread of Doomsie, a disease which affects oxen and used for breeding purposes. In Europe and America it has been necessary to introduce stringent restrictions to check the disease. It has it is only in recent years that its existence in India has been definitely established. In 1902 the question of adopting measures to prevent its spreading was brought before the Government, and it was proposed to prohibit the disease under the Quarantine and Fairs Act. This could not however be done, as Doomsie, though dangerous, is a zoonosis and not an epidemic disease within the meaning of section 2 of that Act. It was also considered advisable that further enquiries should be made before any legislation was attempted, and an investigation was accordingly conducted in 1905 in the Punjab and the western districts of the United Provinces by Colonel Paine, who was then Principal of the Lahore Veterinary College, and whose authority is well known. The investigation showed conclusively that the disease existed in various parts of those provinces, that it had been the cause of much loss of valuable animals and that it threatened seriously to affect the means of horse breeding. Enquiries have since been made in other parts of the area, and these have fortunately shown that the existence of the disease has not as yet been detected in west provinces. It is however of so serious a character as to make it necessary to have power to deal with it in any local areas where it may be found to exist; and a draft Bill was accordingly prepared and circulated to Local Governments for their opinion. This Bill, with the modifications thought necessary to meet the criticisms received from Local Governments, is the measure which I now ask leave to introduce. It is a purely preventive measure, and does not come into force except in areas in which a Local Government may think it necessary to direct that it should be applied. When brought into force it gives the Local Government certain powers for the registration of horses used for breeding purposes as well as for the appointment of veterinary inspectors with powers of search and examination, and of veterinary practitioners with powers extending to certain cases, and with the approval of higher authorities, to enforce the destruction of animals affected. At the same time, in order to prevent any hindrance to private owners and to secure, as far as possible, their co-operation in the measures for detecting the disease and preventing its spread, provision is included for the grant of pecuniary compensation, where loss may have been caused by the action taken under the powers given by the Bill."

The motion was put and agreed to.

The Hon'ble Mr. Munro introduced the Bill.

The Hon'ble Mr. Munro moved that the Bill, together with the Statement of Objects and Reasons relating thereto, be published in the Gazette of India in English and in the local official Gazette in English and in such other languages as the Local Governments think fit.

The motion was put and agreed to.

INDIAN PAPER CURRENCY BILL.

The Hon'ble Sir Guy Fawcett Wilson moved for leave to introduce a Bill to amend and amend the law relating to the Government Paper Currency.

The motion was put and agreed to.

The Hon'ble Sir Guy Fawcett Wilson said:—"My Lord, I beg to introduce a Bill for the amendment of our Paper Currency law. This Bill is now cited by the new policy in regard to the nationalisation of currency notes which I indicated in my Budget speech. With our important exception, our currency notes have hitherto been issued from separate circles, and are, generally, current only within these. We have four main circles of issue, whose head quarters are, respectively, at Calcutta, Madras, Bombay and Bangoon. But there are also sub-circles of issue, with head quarters at Lahore, Cawnpore, Karachi and Calcutta, and notes issued there are current not merely at the sub-circle office in question, but at the head office in which each sub-circle is attached. Cawnpore and Lahore being, for this purpose, auxiliary to the head office at Calcutta, Karachi to that of Bombay, and Calcutta to that at Madras."

"The exception I noticed just now is in respect to the five-rupee note. In 1903 we made this national currency issue, and a five-rupee note could be cashed at any Currency office in India proper, and in 1905 we extended this privilege to the British note also, so that a five-rupee currency note is now national, as regards circulation and redemption, throughout British India. We saw, as I indicated in my Budget speech, reasons to take a large further step in this direction. We desire to make the five-rupee and the fifty-rupee currency notes similarly national, and we thus propose the Bill now put before the Council to adopt a like method in regard to notes of even higher value, should circumstances render such action desirable. We do not propose to

automatically the two-rupee note; its circulation is small, and it makes no sense to increase it in frequency combined with the two-rupee note; and it enters into undesirable competition with the one-rupee, the circulation of which in India we desire to see increased. We do not propose to tell in any of these circulating two-rupee notes, that we shall issue as many of these, and as these are in circulation come back to us, they will not be increased.

The important conclusion is the public involved in the introduction of the two-rupee and fifty-rupee notes will involve additional stress on our Currency balances, and we think it imprudent and desirable to restrict them to some extent by doing away with the former privilege of receiving un-enclosed references from subscribers at the head offices in which these belong. Hereafter, the interest from them, Calcutta and Karachi will become independent offices, and un-enclosed references issued within these offices before the passing of the new Bill should be immediately acknowledged at their respective head offices.

The transmission of the Calcutta sub-office are now as small a note, that we have decided to close it. Any notes issued from Calcutta prior to such closure will, however, be available in Madras. Close entirely with these arrangements, we propose, as I indicated in my budget speech, to withdraw the special concessions by which notes of silver rupees are received in payment of Government dues, and in railway and post office. The introduction of the two-rupee and fifty-rupee notes will attract interference arising from these arrangements. At the same time we intend to prevent any possible interference in silver trade by the new conditions, to lower our rate for Treasury and Currency transfers as much as the present Bill allows law. The arrangements I have just mentioned are, however, matters for consideration, and have not, therefore, been dealt with in the Bill.

The policy which I have thus sketched out has been decided upon after consultation with the Presidency Board, the Exchange Bank (through their association in Calcutta and Bombay) and the several Chambers of Commerce, and has evoked general approval from all these. But in order to obtain further elucidation of public opinion, I propose, shortly to introduce the Bill in Council. It will then be published for general reference, and no further steps towards its passing into law will be taken until the next Calcutta session. The statement which the Bill introduces in the meeting has been, I think, sufficiently explained in the Statement of Objects and Reasons, and I need not, therefore, take up the time of the Council in addition to that now. I will only say that we are not altering our general Currency policy, and that the legislation now proposed merely provides the necessary instrument for giving effect to the larger introduction of currency notes which I have now explained, a policy which has already been so well received by the public.

The Hon'ble Mr. CHITAMPARAN WILSON stated that the Bill, together with the Statement of Objects and Reasons relating thereto, he published in the *Monthly List* in English, and in the local official Gazette in English and in such other languages as the Local Government think fit.

The motion was put and agreed to.

The Council adjourned to Friday, the 10th September 1909.
